

# Application/Game Developer - Munich

According to Gartner Inc., Augmented Reality is one of the Top 10 strategic IT technologies of our time. And Juniper Research forecasts a \$1.5 billion revenue stream by 2015. But AR is even more than that. We are at the dawn of a new era. The virtual and the real world are becoming one. With Augmented Reality technology we can access, understand and enjoy digital data, exactly where we expect it to be and tailor it to our liking. AR is the user interface of the future.

With more than 10 years of experience, 500+ projects, more than 450 business customers, an international partner network, numerous federal, national and international research projects and a comprehensive, patented product portfolio, metaio is a pioneer and leader in this game changing technology field. Based on the Unifeye platforms we connect any object to additional, digital information. Our vision is the seamless and easy integration of the virtual into the real world.

metaio is a self-funded and fast growing technology company. Founded in 2003, we currently employ more than 75 team members in two different locations. The company is headquartered in Munich (Germany) with a subsidiary in San Francisco (U.S.A).

For our Munich operations, we are seeking an employee to support our application development and projects department.

## Task profile:

- Responsible for customer projects
- Supporting the concept phase and giving creative input
- Requirements analysis / engineering
- Design, user experience, application story book
- Project communication
- Implementation and deployment
- Collaboration with the core development, research and product development
- Improving the internal development process
- Customer and service orientation

## Qualifications:

- Degree in (applied) Computer science or equivalent technical/creative degree or according and well founded working experience
- Preferably one year of work experience or more
- Very good programming/development skills, mainly in Adobe Director/Shockwave/Lingo, Adobe Flash for online and offline applications
- Experience in game development and/or user interface design would be very much appreciated
- Preferably experience with 3D modeling/animations/content creation
- Experience in the implementation of customer projects and delivery of exciting (AR) experiences to the customer and end-user.
- Very good English language skills
- Creative, analytic and strategic abilities
- Ability to work independently
- High motivation and personal engagement

**What we offer:**

- Potential for experience and opportunities in a growing, cutting-edge industry
- Engaging and challenging responsibilities and day-to-day tasks with a hand-picked multi-national team
- Competitive salary and benefits

If you are interested in working in an exciting and multi-disciplinary work-environment, are comfortable with a dynamic tech-driven atmosphere and are looking for good future career opportunities, then metaio may be the place for you. We are looking forward to your application.
