

Software Development - Munich

According to Gartner Inc., Augmented Reality is one of the Top 10 strategic IT technologies of our time. And Juniper Research forecasts a \$1.5 billion revenue stream by 2015. But AR is even more than that. We are at the dawn of a new era. The virtual and the real world are becoming one. With Augmented Reality technology we can access, understand and enjoy digital data, exactly where we expect it to be and tailor it to our liking. AR is the user interface of the future.

With more than 10 years of experience, 500+ projects, more than 450 business customers, an international partner network, numerous federal, national and international research projects and a comprehensive, patented product portfolio, metaio is a pioneer and leader in this game changing technology field. Based on the Unifeye platforms we connect any object to additional, digital information. Our vision is the seamless and easy integration of the virtual into the real world.

metaio is a self-funded and fast growing technology company. Founded in 2003, we currently employ more than 75 team members in two different locations. The company is headquartered in Munich (Germany) with a subsidiary in San Francisco (U.S.A).

For our Munich operations, we are seeking an employee to support our Software Development team.

Task profile:

- Working on customer projects
 - Requirements analysis / engineering
 - Design
 - Project communication
 - Implementation
- Collaboration with the core development, research and product development
- Improving the internal development process.
- Customer and service orientation

Qualifications:

- Degree in Computer science or equivalent technical degree
- Preferably one year of work experience or more
- Very good programming skills, mainly in C++/C#
- Experience in object oriented software engineering (UML. Design patterns, etc)
- Knowledge in the area of computer vision and computer graphics
- Experiences in the implementation of software projects
